

1 YEAR PROFESSIONAL DIPLOMA IN SCIENTIFIC VASTU

Scientific vastu is the science of ancient Indian architecture and design. It is basically the study of occupants in context to building in relation to land, location and environment. It is aligning land and building with the laws of nature (micro climatic conditions). In modern words it is creating a sustainable habitat which is green and healthy too.

Scientific vastu is a science of creating automation systems in building in connect with forces of nature. It is a homeostatic building in itself. Another perspective of scientific vastu is that it is a study of harmonious transformation or manifestation of energy into matter or its states or vice versa.

One year diploma in scientific vastu focuses on all aspects of architectural, Vedic and green concepts. It deals with industrial, commercial, entertainment, educational vastu along with town planning. It also deals with new construction, remedies for existing building and remodeling design projects as per scientific vastu. This program is complete study of both science and mythology of Vedic architecture and design.

Design Gurukul provides most reasonable and logical remedies in scientific vastu. It intends to prohibit use of products in vastu science. It does not promote commercial products and commercial gimmicks. Design Gurukul teaches both architectural and Vedic remedies which are genuine, simple and affordable too. Rectification in scientific vastu TM does not need huge investments but needs deep knowledge to understand how to rectify the defects logically.
